Create a Data Visualization with Python

Create a Data Visualization with Python

100% COMPLETE

- LESSON 1: CREATE A DATA VISUALIZATION USING PYTHON
  - About this lesson: Create a data visualization using Python
  - Activity: Track water consumption and energy use
- WRAP-UP
  - Points to remember
  - Final assessment
  - Module completion

EXIT COURSE

Module completion

Congratulations!

Confirm that module completion shows as **100%** at the top of the navigation menu. If module completion is not 100%, go to any page that does not have a check mark beside it and select the **Next** button. You can then close this window and return to IBM SkillsBuild to continue your learning journey.

About this learning activity

Python code can create real-world statistical graphs and geospatial data representations. In this course, you'll explore a real-world sustainability issue by creating a data visualization chart using Python.

What you'll learn
After completing this course, you should be able to:

- Perform basic plotting
- Create meaningful charts that represent key findings from a data set using Python
